

## Description

This Component enables Joomla!-Administrators to connect or switch an individual Stylesheet to any published Menu-Item. The Connection may be automatically handed down to all included Sub-Items. You may also assign individual styles to any existing menu (menuname).

## Install

The Installarchive contains the component and a required systemplugin, which will be automatically installed and published. css2switch is compatible to Joomla! 1.5.x native mode and generates strict XHTML 1.0 output.

## Uninstall

Uninstall with Joomla!-Installer will remove all Folders, Files and MySQL-Tables of the css2switch-component and -plugin.

## License

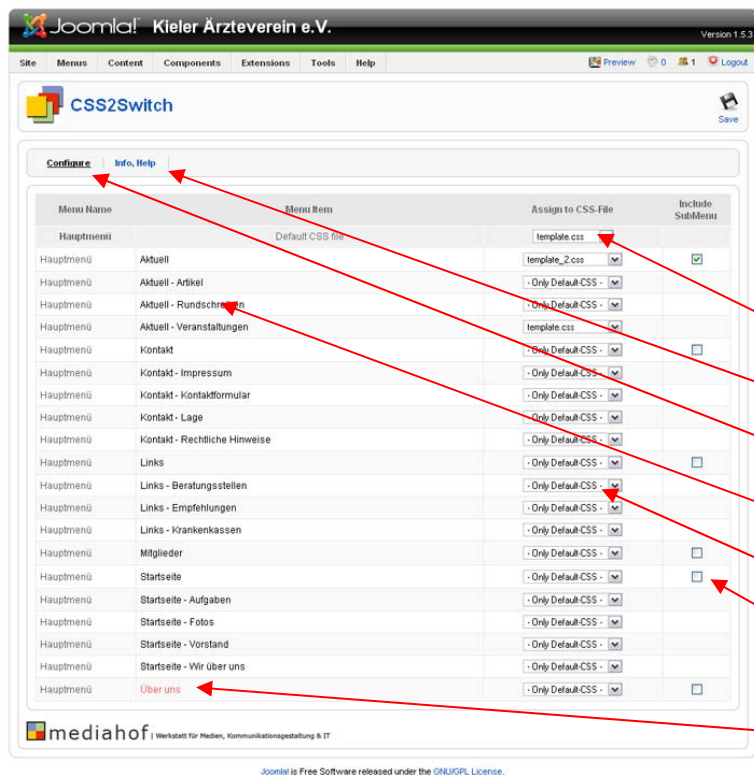

css2switch is brought to you by mediahof/Germany. It is released under the GNU/GPL License.

## Use

### Preparing css-files

"css2switch" detects automatically all css-files located in the css-folder of the active sitetemplate. which includes the prefix "template\_" in their filename (e.g. template\_something.css). Style-elements or -attributes, defined in the default-CSS-file, will be overwritten by styles, assigned by css2switch.

Each element-format depending on a special menu-item must be defined in an assigned css-file.

### Use and configuration

1. Any menu(name) must be assigned to a css-file
2. You will find help in the tab called „Info, Help“.
3. Assign the stylesheets in the tab called "configure".
4. The Administration-Screen lists all menu items with their assigned menu name.
5. Connect css-files with menu items in the dropdown-optionlist "Assign to CSS-File".
6. Activating the checkbox nearby, will assign the css-file to existing submenu-items.
7. Unpublished menu items appears with a red font-color.
8. Confirm all changes with the „Save“-Symbol-Button, located in the toolbar on the top.

Our homepage on <http://www.mediahof.de> uses this component for changing header- and content-styles.

Please post your tips, answers or questions depending on this component using our comment-function at [http://www.mediahof.de/cms/open-source/joomla/components/joomla-1-0-x\\_css2switch-komponente](http://www.mediahof.de/cms/open-source/joomla/components/joomla-1-0-x_css2switch-komponente). E-Mails won't be replied by mediahof.

mediahof wishes to bring some pleasure with css2switch.
